PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on frontend engineering experience since June 2022, directly building ReactJS client apps and NestJS backend systems for May Academy Exam. Experienced in enterprise management systems, Zalo Mini Apps, and WordPress; adept at API integration, responsive UI development, performance optimization, and integrating AI/LLM technologies into production workflows.

KEY HIGHLIGHTS

- 40%: Reduced initial page load time through code splitting, lazy loading, and asset optimization.
- 30%: Shortened feature delivery time by architecting a reusable modular UI component library.
- Bvote: Engineered multi-device real-time UI supporting 1,000+ concurrent participants seamlessly.

WORK EXPERIENCE

Frontend Developer · Bvote

01/2026 – Present

- Engineered real-time voting interfaces with instant result updates, optimizing cross-device performance for 1,000+ concurrent participants.
- Integrated video conferencing/live chat modules and administrative dashboards for shareholder management and resolution voting.
- Spearheaded Zalo Mini App (Neobiotech): integrated Zalo OAuth, Zalo Pay, Notifications, QR scanner, and managed store submission and approval.
- Applied Cursor, Claude Code, and MCP into development workflows, optimizing test case generation, code refactoring, and feature velocity.

Frontend Developer · Bytesoft Solutions

06/2022 – 12/2025

- Developed and maintained internal enterprise management systems using React.js and TypeScript, serving 200+ active enterprise users.
- Built responsive landing pages and corporate websites with React.js, Next.js, and WordPress; customized themes and plugins.
- Converted Figma UI/UX designs into responsive web interfaces; managed state with Redux/Zustand and styled with Tailwind CSS, Sass.

FEATURED PROJECTS

Zalo Mini App Neobiotech · Enterprise Zalo Mini App

01/2026 – Present

- Engineered mobile-first responsive UI adhering strictly to ZaUI design standards, delivering a smooth native-like user experience.
- Integrated Zalo core features: Zalo OAuth (one-click login), Zalo Pay payment gateway, Zalo Notifications, and QR scanner.
- Managed build and QA testing workflows (Dev/Testing environments) and achieved official approval on Zalo Mini App Store on first submission.

`ReactJS` `Zalo Mini App SDK` `TypeScript` `Tailwind CSS` `Zalo Pay` `Zalo OAuth` `REST API`

May Academy Exam · Online Assessment & School Management Platform

- Overview: End-to-end online examination platform integrated with comprehensive school administration.
- Frontend: Directly developed dynamic examination interfaces, test-taking workflows, and dashboards using ReactJS.
- Backend: Built robust NestJS REST APIs, automated scoring algorithms, business logic, and PostgreSQL database connections.
- AI & LLM: Integrated OpenAI/Claude APIs with LLM to generate question banks, explain answers, and support essay grading.

`ReactJS` `NestJS` `OpenAI API` `Claude API` `LLM` `PostgreSQL`

Bvote · Shareholder General Meetings & Online Voting Platform 01/2026 – Present

bvote.vn

- Engineered real-time voting interfaces and dynamic result visualization, optimized for 1,000+ simultaneous participants.
- Integrated video conferencing, live attendee chat, and an administrative portal for shareholder identity verification and voting control.

`Next.js` `TypeScript` `Tailwind CSS` `WebSocket` `REST API`

Boffice · Enterprise Internal Operations Platform 2023

- Built real-time analytics dashboards, interactive data visualization, and a project management module with Gantt charts/task tracking.
- Integrated HR, automated timesheet logging, KPI evaluation modules, optimized for 200+ concurrent enterprise users.

`ReactJS` `TypeScript` `Styled Components` `WebSocket` `REST API`

WordPress Web Platforms · Lideco.vn & Client Projects

lideco.vn

- Developed, upgraded, and maintained custom WordPress themes and plugins for Lideco.vn and various corporate websites.

`WordPress` `PHP` `HTML5` `CSS3` `Theme Customization`

TECHNICAL SKILLS

Frontend

`ReactJS` `Next.js` `Vue.js` `Zalo Mini App` `TypeScript` `JavaScript (ES6)` `HTML5` `CSS3` `Sass` `Tailwind CSS` `Redux` `Zustand` `Styled Components`

Backend
